

BSP Inline Test Point Tee Adaptors

BSP Parallel male x swivel female (60° cone sealing) test point adaptor c/w I 620 Minimesse™ test point fitted.

In line SNA Minimesse® pressure test point adaptors are a simple and easy method of adding test points into a system.

Suitable for OEM build or retro-fitting to existing systems, SNA fit between hose joints or manifold and hose.

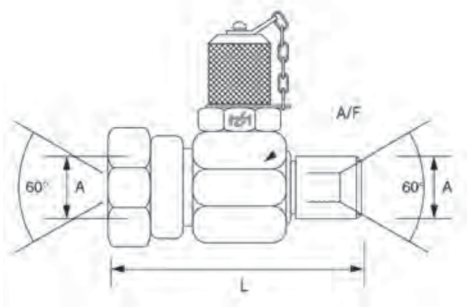

Special configurations are available for OEM applications. Call for details.

Also available in JIC, ORFS & Metric formats.

FEATURES:

- Test under pressure using Hydrotechnik leak free minimesse connections up to 630 bar.
- Connect & disconnect under full system pressure.
- In-line test point tees offer excellent system access versatility.

Now available in stainless steel
